REVIEW MARKETS: THE AND REAL ESTATE BUSINESS.

REVIEW OF MARKETS

FINANCIAL AND COMMERCIAL

Stocks, Money, Exchange, Bonds, Grain, Cotton, Provisions, Etc.

New York, Jan. 16.—Professional opera-tions in stocks fell away considerably to-day, and as there is no other interest in the market, the dealings made further progress toward a condition of stagnation There was some slight speculation in Sugar, Tobacco and the local tractions Sugar, Tobacco and the local tractions, but these represented little more than "swapping jacknives" among the board room traders, as may be judged from the day's small not changes. These speculative favorites are higher on the day, after various fluctuations. There is no better explanation of their having gone up than that they want down weather. There want down was taken. various fluctuations. There is no better explanation of their having gone up than that they went down yesterday. There was evidence of a desire on the part of the shorts to cover in Tobacco, which pushed it up sharply in the late dealings, and the rest of the market with it. It was emphatically a waiting market and it was by no means clear what it was waiting for. The fact that the dullness was shared by the other great speculative centres of the world gives point to the supposition that the development of conditions in South Africa is what is awaited. Morney conditions continue to make progress towards greater ease all over the world, without the slightest effect on speculation. A period of stagnation after so drastice liquidation as that of last month, is by no means unique or abnormal, without counting the South African question. It is generally believed that a Deritish success there would cause a sharp rally in prices, if for no other reason than from the covering made by the bears, who have sold the market in spirit of skeptism over any curity change in the situation. It would be necessary to go back two years to the time of uncertainty preceding the war in Spain to find a parallel for the absolute instressness or patient waiting which are the characteristics of the current stock market.

Rates for time money were shaded below 5 per cent, on choice collateral

Watting which are the characteristics of the current stock market.

Rates for time money were shaded below 5 per cent, on choice collateral under the influence of the large accumulation of reserves which is coming into the New York banks.

Detailings in bends were on a larger scale than those in stocks, and prices were more firmly held. Occasional large individual transactions reflect the continued flow of capital into fixed investments.

Total sales, par value, \$1,565,000.

United States 78 advanced 15c, and old 4s 4c in the bid price. The total sales of stocks to-day were 196,300 shares.

New York, Jan. 16.—Standard Oli, 4,949,456.
